Re: Toxic Substance Control Act Regulated and Prohibited Chemicals

To whom it may concern,

As at the date hereof, Stelco Inc. (Stelco) hereby confirms, to the best of its knowledge, that the steel products manufactured at our facilities do not contain any Persistent, Bioaccumulative and Toxic (PBT) Substances included in the U.S. Environmental Protection Agency's (USEPA) final rules published originally in January 2021 and updated in 2024 under the Toxic Substances Control Act. The substances considered under this declaration include:

- Phenol, isopropylated phosphate (PIP 3:1)
- Decabromodiphenylether (DecaBDE)
- 2,4,6-Tris(tert-butyl) phenol (2,4,6-TTBP)
- Hexachlorobutadiene (HCBd)
- Pentachlorothiophenol (PCTP)
- Trichloroethylene (TCE)
- Perchloroethylene (PCE)
- Carbon Tetrachloride (CTC)

Information about Stelco's products and Safety Data Sheets (SDS) may be found on the company website.

Stelco will continue to monitor the Candidate List and will provide additional information regarding any applicable changes when reasonably practicable.

Please be advised, however, that the foregoing may not apply to pre-painted products supplied to your company by third party steel processors subcontracted by Stelco. The paints used to coat those steel products are specified by the customer. Please contact your Stelco Customer Technical Services Representative if Stelco supplies your company with pre-painted products, or if you have any further questions.
